It is with a feeling of pleasure and privilege that I pen several words of endorsement for the monumental work on the Rambam's Mishne Torah, compiled by Dr Boruch Davidoff שי'.

The Rambam's own mission statement was to facilitate access to Torah law to all, young and old. The current project put together by Dr Davidoff serves that very purpose: to enable even a layman to easily navigate his way through the thousand chapters of the Mishne Torah. This is done by means of tables, links, and other up-to-date methods, thereby making the mastering of the Rambam's classic repository of Torah law within reach of all.

This is a labour of years of dedication and meticulous study, inspired by call of the Lubavitcher Rebbe זי"ע that each and every Jew should study the Rambam's compendium on a daily basis: either to cover the entire material within one year, by studying three chapters daily, or to study one chapter daily, thereby completing the material within three years. For those who are unable to study the Mishne Torah – a parallel route was proposed: to study the Sefer HaMitzvos of the Rambam, in sync with the annual cycle of the Mishne Torah.

May the study of the 'ingathering' of all the laws of the Torah, hasten the ingathering of all the Jewish people, led by Moshiach Tzidkeinu בב"א.

Yours truly,

(Dayan) L Y Raskin

BH

I have examined and checked the vast majority of Dr Baruch Davidoff's work and wish to congratulate him on a job well done. His highlighted Halachos from each chapter of Rambam's Mishnah Torah together with his impressive charts and diagrams which accompany many of the complex issues discussed there will benefit both the layman and scholar alike.

Whether you are looking to read a coherent and lucid summary of any part of the Mishnah Torah, including the daily portion of Rambam, or just to quickly review your studies, Dr Baruch Davidoff's "Studying Rambam – A Companion Volume to the Mishneh Torah" is an indispensable aid to completely and thoroughly understanding it.

I congratulate Dr Davidoff for completing this important project and wish him much Hatzlocho in promoting it. I am confident that this extra step taken in the dissemination of the teachings of the Rambam will hasten the imminent arrival of Moshiach speedily in our days.

It is with immense joy and great satisfaction that I pen these few lines in honour of the publication of Dr Boruch Davidoff's new book on the Rambam. Having known Dr Davidoff for many decades I can only bear witness that his achievement in writing his new book is a credit to his personality, hard work and total commitment and love to G-d's Torah and Yiddishkiet. The English speaking Jewish world will be enriched by his systematic and clean presentation of the Rambam "yad".

I wish Dr Davidoff much success and I am looking forward for the completion of all his works.

Sincerely yours, זכריה
